

Prescott instruments

Labline Universal Instruments Software

A Trusted Name in Material Testing

- Prescott Instruments is a **U.K. company** with **over 30 years' experience** in material testing.
- We manufacture all instruments **onsite in the U.K. under ISO 9001** and our in-house laboratory team perform all **instrument calibrations under ISO 17025**.
- Our **Labline Universal Instruments acquisition software** caters for the need to converge important laboratory data into **one electronic data process**.

Built to Last

Repeatability and Connectivity

- Our **Labline U.I. software** enables the **manual entry of data** from independent instruments that cannot **electrically log data** to a configured database.
- **All manual laboratory equipment and non-Labline configured instruments** such as Testometers, Durometers, and Hardness / Density Meters can be **registered as a generic instrument** into our system.
- In addition to the manual data entry facility, **Prescott Instruments can also provide bespoke modules** for **automatically capturing file data** from a variety of instruments and other software applications.
- This innovative software suite **facilitates the registration of any number of 'generic' instruments**, **configures predetermined test definitions** and **transcribes data** into an ODBC database.

Labline Universal Instruments Software

Technical Specification

Automatic Data Capture

Equipped with file monitoring tools and file data parsing facilitates modules for automatically capturing file data from a variety of instruments and other software applications. This features requires bespoke modules.

Reporting

This software is fully supported in our FlexiReports package that collates all Universal Instrument data and Labline into one report system.

Test Pass/Fail

Test Points can be configured to automatically pass or fail tests based on predetermined gates. Limits can be added and recalculated at any time.

Result Export

Test Results can be exported into a wide range of file types such as .csv for further analysis using Microsoft Excel®, Quality Analyst SPC or any other analysis tool.

User Privileges & Security

Three levels of security have been built into the software, which contain managerial, supervisory and basic privileges. The security system allows users and passwords to be configured and once active can only be disabled by a manager.
